Using Native Plants in your Landscape

By growing native plants, you create a patch of habitat that becomes part of a collective effort to repair and sustain the living landscape for birds, bugs, and people, lessening the local effects of our changing climate. To introduce and educate more people on the benefits of native plants, Wachiska Audubon Society and Spring Creek Prairie Audubon Center have created this two-day self-tour of private yards and public spaces in and around Lincoln. Plant, bird, and insect naturalists will join the owners to help answer questions. For more detailed tour information and locations, see the back of this flyer or click the QR code provided.

All Around Lincoln
Private Yards on Saturday
Public Spaces on Sunday

No tickets necessary, donations are always welcome.

NATIVE PLANT DATABASE

Bring birds to your home today by growing native plants. With Audubon’s Native Plant Database, you can find the best plants for the birds in your area. Growing bird-friendly plants will attract and protect the birds you love while making your space beautiful, easy to care for, and better for the environment.
